Esthetic Rehabilitation in Fixed Prosthodontics, Volume 2

Separate chapters guide the reader to an understanding of the esthetic parameters involved in facial, dentolabial, phonetic, dental, and gingival analysis. Each chapter presents prosthetic considerations and applications that allow the clinician to formulate an optimal treatment plan based on the individual clinical situation of the patient.

These treatment objectives were
successfully met by sequential fixed
prosthodontics treatment using
Pankey–Mann–Schuyler philosophy of
complete occlusal rehabilitation.
Treatment not only restored function
and esthetic, but also showed a positive
psychological impact and thereby
improved perceived quality of life.

Fixed prosthodontics is the area of
prosthodontics focused on permanently
attached (fixed) dental prostheses. Such
dental restorations, also referred to as
indirect restorations, include crowns,
bridges (fixed dentures), inlays, onlays,
and veneers. Prosthodontists are
specialist dentists who have undertaken
training recognized by academic
institutions in this field.
